The Enneagram

Why work with the Enneagram?

The optimisation of the individual and his/her output, contributes significantly to the overall success of the business as the organisation consists of groups of individuals working together. The Enneagram creates a deep awareness of the subconscious drive and motivation of each individual. Through uncovering these, the patterns and motivations become conscious, allowing the individual and team to develop and transcend these. The Enneagram also provides a very powerful model for understanding how development and integration operates, empowering the individual to take responsibility for his or her own behaviours and growth from a greater understanding of why they act and react in a certain way.

Why work with the Enneagram?

The Enneagram is a useful guide on the journey towards self-development, relationship building, conflict resolution and the improvement of team dynamics. Each archetype (1 – 9) resonates with a group of people that think, feel and act similar due to their core motivation. It is not aimed at “boxing”, limiting or categorising people. The Integrative Enneagram Report works with an individual as a more complex, layered, unique and distinct being than any other Typing system.

Who will benefit?
The use of the enneagram assessments enables coaches and organisations a key to unlocking individual, team and organisational health and effectiveness.

Delivery Method
• Online Assessment
• One-on-one in person / via skype debriefing
• In a group workshop / team building format

Using the Enneagram as a Development Tool

The Enneagram does not only fast track insight, growth and integration for the individual client, but also gives depth and durability to the individual development process as it continues to resonate more deeply over time. Through the lines, wings, centre of intelligence, instincts and levels of integration, more subtle and powerful pathways to development open up to the individual.
