The landscape of organisational management and leadership has changed and calls for agility and support in a definite way. Immediate support, partnership and outcomes are required in this fast-paced environment and coaching has proven to be the most effective method.

Obtaining sound coaching skills, and specifically with a Neuroscience foundation, equips the manager, leader, external coach, HR practitioner and entrepreneur with the necessary toolkit and expertise.

Corporate institutions are the largest and most dominant buyers of coaching as a service as it has a direct benefit for creating sustainable growth through strong leadership and a pool of talented people.

At NCI, our programs are based on Applied learning and Neuroscience principles, and the practical in-class approach has proven extremely powerful.
